PROFESSIONAL SUMMARY

Full-stack Software Engineer pursuing an M.S. in Computer Science at USC, with production experience building web applications, data pipelines, and AI-powered tools. Proficient in Python, TypeScript, React, Next.js, and Golang, with hands-on work shipping containerized applications, integrating LLM APIs, and collaborating in Agile teams. Actively seeking software engineering internship or new-grad opportunities.

EDUCATION

University of Southern California

Master of Science in Computer Science. Viterbi School of Engineering | Graduating May 2027.

Relevant Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Applied Cryptography

Los Angeles, CA

August 2025–Present

University of Cincinnati

Bachelor of Science in Computer Science. College of Engineering and Applied Science | Minor in Cyber Operations & Software Engineering | Dean's List: Fall 2020, Summer 2022, Fall 2024, Spring 2025.

Cincinnati, OH

August 2020–May 2025

EXPERIENCE

Software Developer Intern

MediTechSafe Inc

January 2024 – April 2024

Hamilton, OH

- Built and integrated a Flutter frontend with Golang backend APIs, delivering a responsive internal tool with reusable, production-ready UI components
- Refactored and optimized a Python-based web-scraping data pipeline to reliably process 10,000+ records daily, improving stability, performance, and maintainability
- Queried and validated MySQL datasets to troubleshoot data inconsistencies and confirm pipeline accuracy for downstream engineering decisions
- Created internal visualizations summarizing pipeline performance metrics to support engineering and product decision-making
- Participated in code reviews, incorporating feedback to improve code clarity, structure, and maintainability

Software Developer Intern

MediTechSafe Inc

May 2023 – August 2023

Hamilton, OH

- Built scalable Python data pipelines to scrape, clean, and standardize thousands of online records weekly, enabling real-time analysis and expanding monitoring coverage across key platforms
- Automated data-collection workflows processing thousands of records per run, saving 10–15+ hours of manual work per project
- Implemented quality-assurance checks across large datasets, detecting and resolving inconsistencies to ensure reliability before integration into company systems

Software Co-op

ITE LLC

August 2022 – December 2022

Loveland, OH

- Executed technical tasks on engineering projects, including C++ debugging and configuration updates, in collaboration with senior developers
- Applied IoT workflows (Losant) and Neo4j graph databases in a self-directed capacity alongside core project work

Cyber Security Analyst (CSA) Apprentice, Remote

iQ4 Corporation

February 2022 – April 2022

Franklin Lakes, NJ

- Collaborated with 3 fellow cybersecurity interns to build technical skills through case studies, industry mentorship, and hands-on training in security frameworks
- Applied NIST and NICE cybersecurity frameworks and incident-response methodologies to a structured case-study analysis
- Synthesized complex technical findings into written reports and presentations for both technical and non-technical audiences

Peer Teaching Assistant

Department of Engineering Education, University of Cincinnati

January 2022 – May 2025

Cincinnati, OH

- Taught and graded coursework for 72 students (1:24 ratio), mentoring students on teamwork, conflict resolution, and leadership
- Coordinated final project demonstrations and technical logistics for 1,500+ students across course milestones
- Delivered orientation workshops on Engineering Design Thinking to 1,500 incoming freshmen
- Led a summer workshop for 150+ high school seniors on design thinking and hands-on problem-solving

PROJECTS

NexusIQ AI — Enterprise Due-Diligence Platform <https://nexusiq-ai-steel.vercel.app>

- Built a full-stack AI due-diligence tool (Next.js, React, TypeScript, Prisma, PostgreSQL) where parallel LLM agents (Financial, Legal, Compliance, Risk, Fraud) analyze uploaded data rooms via hybrid search and return cited, consensus-based findings

- Containerized with Docker and deployed on Vercel + Supabase, running the LLM layer locally via Ollama to deliver a completed MVP at zero paid AI API cost; source code available at github.com/NehangPatel23

MoodBoard AI — AI-Powered Creative Workspace

<https://moodboard-ai-omega.vercel.app>

- Developed a full-stack AI workspace (Next.js, React, TypeScript, Supabase, TailwindCSS) that converts a creative brief into a structured moodboard using the Gemini LLM API for two-phase generation (draft + streaming image enrichment)
- Shipped real-time collaboration, public sharing/remix, and export to JSON, PNG, PDF, and design-system tokens; containerized with Docker and deployed live on Vercel

FinTrackr — Senior Design Project, University of Cincinnati

- Developed an end-to-end personal finance app in Flutter with modules for expenses, debt payoff, taxes, and financial-literacy resources
- Drove feature scoping, task estimation, and risk identification using Agile methodology (sprint planning, backlog refinement, retrospectives)
- Collaborated with a cross-functional team of 3 on full-stack implementation, testing, and architecture; maintained the project repository on GitHub

CourseArc — Canvas LMS Reimagining <https://canvas-clone-theta.vercel.app>

- Built a full-stack Canvas LMS clone (React, Vite, TypeScript, TailwindCSS, ShadCN/UI) replicating the dashboard, course pages, and discussion boards with a modular, extensible component architecture and dark/light mode

ACTIVITIES & LEADERSHIP

Graduates Rising in Data Science (GRIDS), USC

August 2026–Present

President

- Leading strategy, programming, and member engagement for USC's data science graduate student organization

Graduates Rising in Data Science (GRIDS), USC

January 2026–May 2026

Director of Marketing

- Led branding, outreach, and marketing strategy for student organization initiatives, designing promotional materials and social content in Canva and driving engagement through coordinated campaigns

Graduates Rising in Data Science (GRIDS), USC

October 2025–January 2026

Executive Board Member, Marketing & Outreach

- Drove initial brand presence and member engagement, collaborating with cross-functional teams to align messaging and event promotion

CERTIFICATIONS

- iQ4 Cybersecurity Workforce Alliance, The Threat Within — Cybersecurity Virtual Apprenticeship
- IBM Skills Academy: Build Your Own Chatbot Level 1, User Experience Design Fundamentals, Data Science Tools, Data Science Methodologies, Cloud Core
- IBM Data Science Practitioner, Data Science Foundations Level 2
- IBM / Coursera: Machine Learning with Python
- The Coding School: Introduction to Quantum Computing
- Anthropic: AI Fluency & Frameworks

AWARDS & HONORS

- Dean's List: Fall 2020, Summer 2022, Fall 2024, Spring 2025

SKILLS

Languages & Frameworks: Python, TypeScript, JavaScript, React, Next.js, GoLang, Flutter, Vite, C++, HTML/CSS

Databases & Backend: PostgreSQL, MySQL, Prisma, Supabase, Web Scraping (BeautifulSoup, Selenium), Pandas, NumPy

Tools & Platforms: Docker, Git, GitHub, Gemini API (LLM Integration), TailwindCSS, ShadCN/UI, IBM Watson Studio, ClickUp, Jupyter Notebooks

Project & TPM Skills: Agile, Sprint Planning, Cross-Team Communication, Technical Documentation, Prompt Engineering

Other: MATLAB, LabVIEW, Visual Basic for Applications (VBA), Linux, Windows
